Reception unit

Gloss

Features

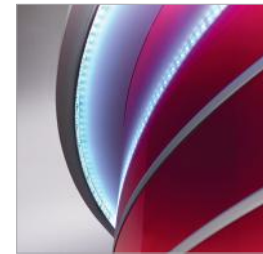

- 1 Tops made from 28 mm thick particleboard, covered with a sheet of melamine (fire safety classification M3) fitted with 2 cable ports \varnothing 80 mm (except DDA module). Straight edge contour banding in 2 mm thick PVC.
- 2 High module tops are glazed with 4 mm thick lacquered glass. Usable depth of 80 cm on worktops for high modules, and 111 cm on worktops for DDA modules.
- 3 Terminal module legs covered in melamine, 28 mm thick. Shared tubular leg design at connection point of 2 modules, facilitating freedom of movement between sections. Straight edge banding in 2 mm thick PVC. Legs fitted with stabilizer feet, adjustable through 15 mm.
- 4 Modesty panels made from MDF, 12 mm thick and covered with glossy laminate panelling.

- Free-standing modules fitted with 2 long legs. These modules can be positioned contiguously in a row, however this reduces freedom of movement between sections.
- Intermediate modules are fitted with tubular legs and must be included in a row of adjacent modules.
- Left-hand end modules are fitted with a long leg configuration on the left section and a tubular leg on the right. This leg configuration is inverted on the right-hand end modules. Left-hand and right-hand end modules are designed to close a reception unit configuration that includes intermediate modules.
- High standard modules are fitted with with LED lighting under the counter (power switch at foot level on user side).

Usable dimensions :
 Usable height between the worktop and counter top : 33 cm
 Usable depth of the worktop with counter top : 80 cm

Cable ports \varnothing 80 mm

High module with LED lighting under the counter top (power switch at foot level on user side)
